**Participant comments:**

It was a great experience, and I warmly thank all the organisers for their efforts

It was an extremely enjoyable program - one of the best summers I've had. Santa Cruz offers an excellent balance of lifestyle and work productivity. I found that I not only had one of the most productive 5 weeks in a long time, but also had one of the most fun and enjoyable summers ever.

Really great experience and amazing people

Thank you for this opportunity. It was an intense and stimulating experience, I have never learned so much in such a short period of time.

The KSP continues to be a great event with real scientific merit. There's very little I'd change in order to improve it (though office space was generally v. tight in the Department)
